

# THERMAL MANAGED PRINT FOR YOUR MISSION-CRITICAL THERMAL PRINTER FLEET **MPS**

Thermal MPS is a holistic approach to optimizing business efficiency and streamlining operations.

Enhanced device usage visibility to better optimize and maintain your thermal printer fleet.

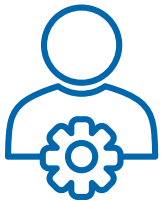

Automated Supply Replenishment to reduce supply chain challenges and control supplies costs.

Remote management of your thermal printers to minimize the impact of labor shortages.

Tools that detect, identify, and prevent potential vulnerabilities to keep your network secure.

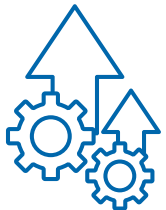

# THERMAL PRINTER FLEETS ARE ESSENTIAL TO MANY BUSINESS-CRITICAL WORKFLOWS BUT ARE OFTEN DIFFICULT TO TRACK AND MAINTAIN.

Zebra estimates that over **50%** of businesses don't know what they're spending collectively on thermal printing. **MPS** provides the visibility and data to improve efficiency and reduce costs.

## **Simpler management**

Single, trusted vendor with established SLAs manages all devices.

## **More efficient device refresh**

Know when a device is reaching end-of-service, refresh without downtime costs.

## **Enhanced security**

Prevent unauthorized access to devices.

## **Financial benefits**

Turn CapEx into OpEx.

## **Operational efficiency**

The use of optimal print supplies can speed up your processes, increase your throughput, and correctly routes your assets.
